Basic

A computer vision engineer who wakes up to build systems that work outside the lab. Experienced in delivering CV systems and training ML models for real-world scenarios.

Experience

Jožef Stefan Institute

Slovenia

Researcher - E8 Dept. of Knowledge Technologies

2025 - Present

- Built dataset and co-developed instruction-tuned Gemma 3 (4B) model for Material Science QA
- Achieved +11% on MaScQA benchmark (preliminary)
- Trained models on HPC (SLURM)

Lords of the Boards

Slovenia

System Architect

2024 - 2025

- Designed a modular inspection framework used across multiple wood-scanning systems
- Replaced full reimplementations with configuration-driven pipelines
- Defined architecture, interfaces, and deployment toolchain that powers the company's products

Key Skills: *Python, PyTorch, Hugging Face, MLflow*

Trilobit

Slovenia

Computer Vision Engineer

2023 – 2025

- Deployed 4 industrial CV systems (1 solo) to automate QC and measurement in manufacturing
- Delivered a solo system achieving ≥97.5% defect detection, <1% false positives
- Built bespoke vision pipelines and illumination setups for challenging real-world conditions

Key Skills: *C++, Python, Lua, OpenCV, Halcon, Adaptive Vision*

Miltera

Turkey

Embedded Software Engineering Intern

2022 – 2022

- Developed register management system used by 350+ modules for device-wide state management
- Enabled communication across heterogeneous sensor modules

Key Skills: *C, C++, FreeRTOS, Linux*

Gebze Technical University

Turkey

Remote Sensing Research Intern

2019 – 2022

- Developed models for *satellite land cover mapping* (Houston + Sentinel datasets)
- Co-authored 2 papers + bachelor's thesis

Key Skills: *Remote Sensing, Computer Vision, Java, Python, PyTorch, OpenCV.*

Education

Jožef Stefan International Postgraduate School

MSc Information Technologies

Slovenia • 2025 - Present

Gebze Technical University

BSc Computer Engineering

Turkey • 2017 – 2022

Honour Degree

Publications

- Scale-Spectral-Spatial Attention Network for Hyperspectral Image Classification**
